EDUCATION

Sacred Heart University

M.S. Cybersecurity
Expected May 2026
GPA: 3.84

Penn State University

B.A. Telecom & Media Industries
Minor: Entrepreneurship
May 2024

SKILLS

SECURITY

Nessus, Wireshark, Nmap, Google SecOps (SIEM/SOAR), Vulnerability Management, Threat Detection, Incident Response, Log Analysis, Penetration Testing, Group Policy (GPO)

CLOUD & INFRA

GCP, AWS EC2, OpenTofu/Terraform, Docker, Linux, Cloudflare

NETWORKING

Network Security, Network Administration, VPN, Firewall Configuration, Packet Analysis, DNS Configuration

SYSTEMS

Windows Server 2022, Windows 11, macOS, Active Directory, Kali Linux, Arch Linux, Proxmox VE, Bash Scripting, SSH

OTHER

Python, HTML/CSS, Git, GitHub, VMware, ITSM/ITIL, TeamDynamix

WEBSITES

brianstyrcula.com

Cybersecurity portfolio on Netlify + Cloudflare

Business site, Cloudflare/Netlify

jamiGOODMANCOACHING.com

Professional executive coaching site

PROFILE

Cybersecurity graduate student with hands-on experience in vulnerability scanning, cloud security infrastructure, security operations, and home lab administration. Currently building a Proxmox-based Active Directory lab environment. Seeking to contribute technical skills and grow within a cybersecurity or IT security role.

COURSEWORK

CY-626 Intro to Cybersecurity

CIA triad, threat modeling, incident response

CY-635 Digital Forensics

Forensic imaging, hashing, registry analysis, FAT

CY-622 Network Security I

VPN tunnels, firewalls, Docker/K8s, Linux

CS-639 Vulnerability Management

Nessus scanning, 5-VM lab, Ettercap, Wireshark

CY-628 Security Management

Designed a VMP covering lifecycle & governance

CS-641 Securing the Cloud

HTTPS LB + IAP on GCP via OpenTofu

PREREQUISITES

CS-505 Computer Networks

OSI/TCP-IP, routing, subnetting, NAT

BUAN-651 Intro to Data & Programming

Python, scripting, data manipulation, pandas

EXPERIENCE

Cybersecurity Intern

FEB 2026 - PRESENT

Sacred Heart University, Fairfield, CT

Assisted security operations team in deploying Google SecOps (SIEM/SOAR) and researched playbook automation

A/V Graduate Assistant

SEP 2025 - PRESENT

Sacred Heart University, Fairfield, CT

Supported Crestron A/V systems across 100+ classrooms; Tier-1 Windows/macOS support via TDX

Owner

AUG 2024 - PRESENT

Brian's Quick Fix, Fairfield, CT

In-home IT support for dozens of clients; routers, Wi-Fi, network security, and safe computing education

PROJECTS

GCP Cloud Infrastructure

CS-641

Built External HTTPS Load Balancer and IAP on GCP using OpenTofu; deployed team app to Cloud Run with SSL and custom domain; assisted teammates as technical resource

Vulnerability Scanning Lab

CS-639

Configured 5-VM lab in VMware (Kali, Metasploitable 2, Win 7, Win 11, MX Linux); ran Nessus credentialed scans; ARP poisoning/MITM with Ettercap; Wireshark traffic analysis

Proxmox Home Lab

PERSONAL

Bare-metal Proxmox VE; Windows Server 2022 domain controller (brian.local); Arch Linux with pentesting tools; Tailscale subnet routing for remote access
